

Privacy and Recording Consent

Data Controller: pdoom UG (haftungsbeschränkt)
Contact: mihir@pdoom.org
Project: crowd-cast data collection

This consent form is separate from the Data Purchase and Participation Agreement. It covers what data is collected, how it is used, and your rights under data protection law (GDPR).

What is recorded

- Screen video of the applications you have selected for recording
- Keyboard and mouse events (keystrokes, clicks, scrolls, cursor movement)
- App and window metadata (which application is active, window titles, timestamps)

What is NOT recorded

- Audio or microphone input
- Camera or webcam
- Applications you have not selected for recording
- Anything during paused or stopped periods

You control what gets recorded

- You choose which applications crowd-cast records. Unselected apps are not captured.
- You can pause or stop recording at any time.
- You can delete recent recordings you did not intend to capture, if the tool supports this.

What you must avoid recording

Even within selected apps, you are responsible for making sure you do not record:

- Passwords, credentials, or login screens
- Private messages or personal conversations
- Meetings, calls, or video chats
- Work covered by an NDA or confidentiality agreement
- Employer-confidential or client-confidential material
- Medical, legal, or financial records

If you accidentally capture something sensitive, pause recording and delete the segment if possible.

How your data is used

- Reviewed by p(doom) for quality control and safety checks
- Used for research, AI model training, and evaluation
- Included in public dataset releases, meaning the recordings could be downloaded and used by other researchers, developers, and the general public

What "public release" means in practice: If your accepted data is included in a publicly released dataset, it will be available for anyone to download and use. This is core to the project's research mission. p(doom) takes steps to filter out sensitive content before release, but you are the first line of defense: do not record things you would not want made public.

Legal basis for processing

p(doom) processes your recording data based on your explicit, informed consent (GDPR Art. 6(1)(a)). Your

personal information (name, email, payout details) is processed based on contractual necessity (GDPR Art. 6(1)(b)).

Withdrawing consent

You can withdraw your consent for future recordings at any time by stopping the recorder and notifying p(doom) at mihir@pdoom.org.

- Future recordings: No further data will be collected from you.
- Unpublished data: p(doom) will delete recordings that have not yet been accepted, paid for, or published.
- Published data: Recordings that have already been accepted, paid for, and released as part of a public dataset cannot be practically retracted. Once data is in the hands of third parties who downloaded a public dataset, p(doom) cannot force them to delete it.

This is why it is important to only record content you are comfortable sharing before you start.

International data transfers

Your recording data may be stored and processed on servers located outside the EU/EEA. When data is included in a public dataset release, it will be accessible worldwide. By consenting, you acknowledge these transfers.

Data retention

- Recordings under review are stored on p(doom)'s secure infrastructure until accepted or rejected.
- Rejected recordings are deleted.
- Accepted recordings may be retained indefinitely as part of the research dataset.
- Your personal information is retained for as long as needed for participation and legal/accounting obligations, then deleted.

Your rights

Under GDPR, you have the right to: access your data, correct inaccurate data, request deletion (subject to limitations for published datasets), object to processing, data portability, and lodge a complaint with the Bayerisches Landesamt für Datenschutzaufsicht (BayLDA) at lda.bayern.de.

To exercise any of these rights, contact mihir@pdoom.org.
